I'd like to have Jack give me a call. I understand that you're the right person to talk to about the unhealthy justice being spewed out of this Lehigh Plant. As I look at it right now right now off of my deck, I can see the stuff spewing out. I have photographs of it daily. This crap is getting all over my deck. I can actually sweep it up as I put a carpet out there and I have a pile of it. I leave the window open and my closet and clothes are covered with it, my sinuses are bugging me on a regular basis and it seems to be getting worse all the time. So, we need to talk, we need to get to the bottom of this, otherwise, I'm most certain that the people of City of Monte Vista will gather a class action lawsuit. This has to be taken care of. You cannot basically take advantage of these people anymore. Once again, I want to hear from you. I'm at 408-499-0584-that's my cell phone. And, I've been gathering data and pictures, actually HD movies on a daily basis, and if I have to build a website that shows what's going on and Google it all over the world, I'm more than happy to do it. I'm not a very happy person because I know they've been trying to get some action out of you people and it seems like you could care less. Once again, 408-499-0584.
