My Air Quality: Using Sensors to Know What's in Your Air

Manufacturers have begun marketing air monitoring sensors to measure air pollution, and local environmental groups and the public are considering them as inexpensive options to independently evaluate local air quality. The purpose of this forum is to share the latest information on monitoring and sensor technology, their various applications, and their limitations. This workshop will feature experts from various governmental and academic institutions, the private sector and community groups. The SCAQMD encourages anyone interested in this topic to attend this open discussion on sensor performance and data quality as well as sensor issues confronting agencies and proposed next steps.

Topics will include:

- Available Sensor Technology, Performance and Data Quality
- Community Projects, Sensor Development and Applications
- Sensor Technology Demonstration and Posters

Where:

Northern California
November 19, 2014
9:00 a.m. to 5:00 p.m.
Elihu M. Harris State Building
1515 Clay Street
Oakland, California 94612

Southern California
November 21, 2014
9:00 a.m. to 5:00 p.m.
South Coast AQMD
Auditorium
21865 Copley Drive
Diamond Bar, California 91765

CAPCOA
California Air Pollution Control Officers Association

Bay Area Air Quality Management District

South Coast AQMD

Jointly hosted by CAPCOA, SCAQMD and BAAQMD, this Air Quality Sensor Workshop will be open to the public and free of charge. An agenda and webcasting information will be available shortly and posted on the following websites:
www.capcoa.org, www.aqmd.gov and www.baaqmd.gov.
