FROM: Bay Area Air Quality Management District

RE: Permit Application #11465 for the following source of air pollution:

Capstone C60 Micro Turbine  
Foothill High School  
4375 Foothill Road  
Pleasanton, CA 94588

---

The Bay Area Air Quality Management District (the "District") is a local government agency that regulates stationary sources of air pollution such as factories, industrial sites, and gasoline stations.

Whenever we receive a permit application for a new or modified source of toxic air contaminants located within 1,000 feet of a school site, State law requires that we notify the public. To comply with this requirement, we distribute or mail a Public Notice to the parents or guardians of students enrolled at schools located within ¼ mile of the proposed source and all residents and businesses located within 1,000 feet of the proposed source.

You have received this Public Notice because a permit application for the above referenced source of air pollution has been filed with the District. A description of the proposed project follows:

The Pleasanton Unified School District has applied for a permit to operate a natural-gas fired turbine that will be used to generate electricity and heat the swimming pool at Foothill High School.

The District has determined that the increase in health risks resulting from toxic air contaminant emissions from the proposed source are not significant and that the project will comply with all other applicable air pollution control requirements. Accordingly, the District plans to issue a Permit to Operate for the proposed source.

If you are interested in getting more information on the District's evaluation of this proposed project, you may request copies of the applicable staff report by calling the District at the telephone number listed at the end of this notice. This information also can be viewed or downloaded from the District website at:
