

BAY AREA
AIR QUALITY
MANAGEMENT
DISTRICT

PUBLIC NOTICE

March 8, 2006

TO: Parents or guardians of children enrolled at the following schools:

Saint John the Baptist Catholic School, Napa
New Technology High School, Napa

All residential and business neighbors located within 1,000 feet of the proposed new or modified source of air pollution listed below.

FROM: Bay Area Air Quality Management District

RE: Permit Application for the following sources of air pollution:

Soil Vapor Extraction System and Treatment System
D'Adamo Property
1509 Main Street, Napa

The Bay Area Air Quality Management District (the "District") is a local agency that regulates stationary sources of air pollution such as factories, industrial sites, and gasoline stations.

Whenever we receive a permit application for new or modified sources of air pollutants ("toxic air contaminants") located within 1,000 feet of a school site, State law requires that we notify the public and inform residents that there is a 30-day period for public response to the proposal. To comply with this requirement, we distribute or mail a Public Notice to the parents or guardians of students enrolled at schools located within ¼ mile, and all residents and businesses located within 1,000 feet, of the proposed sources.

You are receiving this Public Notice because a permit application has been filed with the District for the above referenced source of air pollution. A description of the proposed project follows:

During operation of a gasoline service station formerly located at this property, petroleum hydrocarbons leaked into the surrounding soil and contaminated both the soil and groundwater. To remedy this existing contamination problem, a Soil Vapor Extraction and Treatment System will be operated at this site. On behalf of the property owner, EBA Engineering has proposed a system consisting of a liquid ring pump that will extract petroleum vapor from wells drilled at the site. Treatment of the extracted vapor will be accomplished by either a thermal/catalytic oxidizer, or carbon adsorption vessels arranged in series. Emissions from the proposed source will be significantly controlled; however, it is not possible to control the source such that emissions are zero.

The District has determined that the project will comply with all applicable air pollution control requirements and that the increase in health risks resulting from air contaminant emissions from the proposed sources are within satisfactory levels. Accordingly, the District plans to issue a Permit to Operate for the proposed project.

If you are interested in getting more information on the District's evaluation of this proposed project, you may request copies of the applicable staff reports by calling the District at the telephone number listed at the end of this notice. This information also can be viewed or downloaded from the District website at:

PUBLIC COMMENT PERIOD

If you wish to comment on the proposed project, you may do so in writing or by e-mail. Alternatively, you may call and leave a telephone message up to one minute in length. Please leave your name and telephone number so that a District staff member may respond to your message.

Please use the following contact information if you would like to comment on the proposed project:

Mailing address: D'Adamo Property SVE System Public Notice Response
BAAQMD
Engineering Division
939 Ellis Street
San Francisco, CA 94109
Attn: Robert Cave

E-mail address: rcave@baaqmd.gov

Telephone Number: (415) 749-5006

The public comment period for this project ends on April 7, 2006.
