---

The Bay Area Air Quality Management District (the BAAQMD) is a local agency that regulates stationary sources of air pollution such as factories, industrial sites, and gasoline stations.

Whenever we receive a permit application for a new or modified source(s) of toxic air contaminants located within 1,000 feet of a school site, State law requires that we notify the public. To comply with this requirement, we distribute or mail a Public Notice to the parents or guardians of students enrolled at schools located within ¼ mile, and all residents and businesses located within 1,000 feet, of the proposed source(s).

You are receiving this Public Notice because a permit application has been filed with the BAAQMD for the above referenced source(s) of air pollution. A description of the proposed project follows:

*Verizon Wireless (De Anza/Fremont)* has applied for an Authority to Construct and/or Permit to Operate a Stationary Emergency Diesel Engine Powered Generator that will be used for providing electrical or mechanical work during emergencies, and will be periodically run for maintenance, reliability testing, and/or emissions testing.

**The BAAQMD has determined that the increase in health risks resulting from toxic air contaminant emissions from the proposed source(s) are within acceptable levels, and that the project will comply with all other applicable air pollution control requirements. Accordingly, the BAAQMD plans to issue a Permit to Operate for the proposed project.**

If you are interested in getting more information on the BAAQMD's evaluation of this proposed project, you may request copies of the applicable staff report(s) by calling the BAAQMD at the telephone number listed at the end of this notice. This information also can be viewed or downloaded from the BAAQMD website at:
