REGULATION 10

STANDARDS OF PERFORMANCE FOR NEW STATIONARY SOURCES

The provisions of Title 40 of the Code of Federal Regulations Part 60 (40 CFR 60) in effect August 7, 1991, applicable to the Subparts listed in this Regulation are made part of the Rules and Regulations of the Bay Area Air Quality Management District. Whenever any source is subject to more than one rule, regulation, provision or requirement relating to the control of any air contaminant, in cases of conflict or duplication, the most stringent rule, regulation, provision, or requirement shall apply.

All new sources of air pollution and all modified or reconstructed sources of air pollution shall comply with the standards, criteria, and requirements set forth herein, except that sources of air pollution subject to and in compliance with standards in 40 CFR 63 for which specific exemptions from 40 CFR 60 exist shall not be subject to the standards, criteria, and requirements set forth herein. For the purpose of this Regulation, the word "Administrator" as used in 40 CFR 60.2 shall mean the Air Pollution Control Officer of the Bay Area Air Quality Management District, except that the Air Pollution Control Officer shall not be empowered to approve alternate or equivalent test methods nor alternative standards or work practices. Other deviations from these federal standards as presented in the CFR and which were ordered by the Bay Area Air Quality Management District Board to suit the needs of the Bay Area Air Quality Management District are noted in the affected Subpart.
