

ERRATA – AGENDA ITEM #14

Correction of Table 4b: Emissions of Relevant Pollutants by Source Category for Contra Costa and Solano Counties from the *Petroleum Refinery Emissions Reduction Strategy: Staff Report* (December 2015):

Refinements to methods used to determine emissions information in Table 4a: *Bay Area Emissions of Relevant Pollutants by Source Category* were not applied to emissions calculations used in Table 4b: *Emissions of Relevant Pollutants by Source Category for Contra Costa and Solano Counties*. In order for the two tables to be comparable, Table 4b was updated using the same method for determining emissions used in Table 4a. Corrected Table 4b is presented below.

Table 4b: Emissions of Relevant Pollutants by Source Category for Contra Costa and Solano Counties¹

Source Category	Emissions (tons/yr)							
	PM _{2.5}	%	Anthropogenic ROG	%	NO _x	%	SO ₂	%
Refineries	1,330	26%	5,178	22%	4,137	16%	3,009	64%
Coke Calcining	28	1%	0	0%	239	1%	1,242	27%
Cement Plant	0	0%	0	0%	0	0%	0	0%
Other Major Industrial	569	12%	3,383	14%	2,139	8%	85	2%
Residential/Commercial	1,548	32%	5,649	23%	1,122	4.4%	49	1.1%
Agricultural	97	2%	369	1%	0	0%	0	0%
Miscellaneous	294	6%	20	0%	2	0%	0	0.0%
Mobile Sources	1,212	25%	9,041	36%	17,703	69.6%	296	6%
Total	5,079	100%	23,639	100%	25,341	100%	4,681	100%
