Air District issues another Spare the Air Smog Alert *Bay Area residents urged to find alternatives to driving alone*

SAN FRANCISCO – Today, the Bay Area Air Quality Management District is issuing its fourth Spare the Air Alert for smog in 2015. A smoke advisory is also in effect due to smoke impacts from wildfires around California.

Air quality is forecast to be unhealthy again tomorrow, Monday, August 17. A high pressure system over California will produce clear skies, light winds and triple-digit inland temperatures. These conditions, combined with motor vehicle exhaust, will produce unhealthy ozone levels. The combination of smoke and smog may further aggravate symptoms associated with poor air quality.

“The Bay Area is experiencing serious air pollution due to the fires and smog,” said Jack Broadbent, executive officer of the Air District. “It’s important that Bay Area residents protect their health by avoiding outdoor activities and avoid polluting more by not mowing lawns, using BBQ lighter fluid or driving alone.”

Nearly 40 percent of Bay Area smog pollution and greenhouse gases are from passenger vehicles. The single most effective way for residents to reduce smog pollution is to drive less. Air District survey results find that Bay Area employees are more likely to adopt alternatives to driving alone when encouraged to do so by their employer. Bay Area employers with 50 or more full-time employees are now required to offer commuter benefits to their employees. For more information about the Commuter Benefits Program, visit 511.org and click on Bay Area Commuter Benefits Program.

Spare the Air Alerts are issued when ozone pollution is forecast to reach unhealthy levels. Ozone, or smog, can cause throat irritation, congestion, chest pain, trigger asthma, inflame the lining of the lungs and worsen bronchitis and emphysema. Long-term exposure to ozone can reduce lung function. Ozone pollution is particularly harmful for young children, seniors and those with respiratory and heart conditions. When a Spare the Air Alert is issued, outdoor exercise should be done only in the early morning hours when ozone concentrations are lower.

To improve air quality, residents are encouraged to walk, bike, carpool or take transit instead of driving alone, not just on Spare the Air days, but every day. Residents can visit www.stacommuetips.org to find a list of commute programs and incentives available where they live and work.

To find out when a Spare the Air Alert is in effect, residents can register for email AirAlerts at www.sparetheair.org, call 1(800) HELP-AIR, download the Spare the Air App or connect with Spare the Air on Facebook or Twitter.

There is no free transit tomorrow and there is no wood burning ban in place.

The Bay Area Air Quality Management District (www.baaqmd.gov) is the regional agency responsible for protecting air quality in the nine-county Bay Area. For more information about Spare the Air, visit sparetheair.org.
