

Northern California Refinery Safety Forum

Oil-moving, monitoring and warning

Sponsored by the California Interagency Refinery Safety Task Force

A comprehensive information and dialogue session regarding refinery safety and the movement of oil in Northern California

Following the August 2012 Richmond refinery fire, the Governor’s Working Group on Refinery Safety recommended increased interaction between refineries, labor, communities, and environmental groups on topics related to worker and community safety. Informed community involvement will help the Task Force reach its goals of maximizing worker and community safety, and promoting efficient refinery operations.

Don’t miss this opportunity to obtain facts and insight and engage in discussion on key issues regarding oil and refineries in the Bay Area in a neutral setting.

For more information please contact refinery@calepa.ca.gov or 916-327-9558.
