The purpose of this minor permit revision is to incorporate permit condition changes that allow landfill gas to be diverted to an off-site energy plant, clarify operating requirements for the on-site landfill gas flare, modify the landfill gas collection system description, and allow specific landfill gas collection system components to operate on an intermittent basis. The District is adding new applicable requirements related to less than continuous operation of the landfill gas collection and control systems. These condition changes do not result in any emission increases and do not reduce the frequency of any monitoring provisions.

The District did not receive any comments on the proposed minor revision from EPA, ARB, or the facility.

The final permit can be viewed on the BAAQMD website at <http://www.baaqmd.gov/Divisions/Engineering/Title-V-Permit-Programs/Title-V-Permits.aspx>. We will also send the permit to you via the Electronic Permit Submittal System. If you have any questions regarding this permit revision, please call Dennis Jang, Senior Air Quality Engineer, at (415) 749-4707.

Sincerely yours,
