APPENDIX A-1 NOTES

This List of Substances was established by Titles 17 and 26 of the California Code of Regulations Section 93001.

GENERAL NOTE: For all substances listed which contain the word "compounds" and for glycol ethers, the following applies: Unless otherwise specified, these listings are defined as including any unique chemical substance that contains the named chemical (i.e., antimony, arsenic, etc.) as part of that chemical's infrastructure.

- 1 X'CN where X=H' or any other group where a formal dissociation may occur.  
For example KCN or Ca(CN)<sub>2</sub>
- 2 includes mono- and di-ethers of ethylene glycol, diethylene glycol, and triethylene glycol (R(OCH<sub>2</sub>CH<sub>2</sub>)<sub>n</sub>-OR' where  
n = 1,2 or 3  
R = alkyl or aryl groups  
R' = R, H, or groups which, when removed, yield glycol ethers with the structure R(OCH<sub>2</sub>CH)<sub>n</sub>-OH. Polymers are excluded from the glycol category.
- 3 includes mineral fiber emissions from facilities manufacturing or processing glass, rock, or slag fibers (or other mineral derived fibers) of average diameter 1 micrometer or less.
- 4 includes organic compounds with more than one benzene ring, and which have a boiling point greater than or equal to 100°C.
- 5 a type of atom which spontaneously undergoes radioactive decay.
