Emission Reduction Credits Requested (tons/year)

PM _{2.5}	PM ₁₀	Precursor Organic	NO _x	SO ₂	CO	Non Precursor Organic

Regarding the Sale of Emission Reduction Credits

The District regularly receives inquiries from plants requiring and looking to purchase emission reduction credits (ERCs). In order to assist these plants, the District web site includes a report of ERC owners willing to be contacted regarding the sale of their credits. Please indicate below if you would like to be included in this report.

YES, I would like to be listed in the District report of ERC owners.

Requirements for a Complete Application

In order to avoid delays in processing this application all emission banking applications should include the following information. Please note that not all emission reductions can qualify for emission reduction credits. Please pay particular attention to the regulations cited below in order to avoid the denial of your request. All rules and regulations and data forms cited below can be found on the District's website at baaqmd.gov.

- A completed P- 401 data form (this form).
- A filing fee and an initial fee for each source for which emission reduction credits are being requested (Regulation 3-311). Contact your assigned plant engineer for help in determining the correct application fees, or submit no fees and you will be invoiced by the District.
- Measurements and/or calculations before and after reductions are achieved, including a discussion of the calculation and/or measurement methods. Please refer to Regulation 2-2-605 for the District's emission reduction calculation procedures.
- Documentation (operating logs, material purchase records) to establish that the parameters used are accurate and representative of actual emission reductions.
- It is the responsibility of the applicant to demonstrate that emission reductions from a shutdown source will not result in a similar increase of emissions at other sources in the District because of a continued demand for the product or service. (Regulation 2-4-303.2)

IMPORTANT: Under the California Public Records Act, all information in your permit application will be considered a matter of public record and may be disclosed to a third party. If you wish to keep certain items separate as specified in Regulation 2, Rule 1, Section 402.7, please complete the following steps:

- (a) Make a copy of any page containing confidential information with the confidential information blanked out. Label this page "Public Copy."
- (b) Label the original page "Confidential." Circle all confidential items on the page.
- (c) Prepare a written justification for the confidentiality of each confidential item. Append this to the confidential copy.

Date:

Emission Reductions (tons/year) - Reported by Source

Source No.	Description	Effective Date ¹	PM _{2.5}	PM ₁₀	POC	NO _x	SO ₂	CO	NPOC

1. The effective date of the emission reduction is the date the source was removed from service or the date that the emissions were permanently reduced from the source's previous level of emissions.
