

BAY AREA
AIR QUALITY
MANAGEMENT
DISTRICT

PUBLIC NOTICE

November 25, 2008

TO: Parents or guardians of children enrolled at the following school(s):

Park Middle School

All residential and business neighbors located within 1,000 feet of the proposed new or modified source of air pollution listed below.

FROM: Bay Area Air Quality Management District

RE: Permit Application #18384 for the following source of air pollution:

**Soil Vapor Extraction System
Shell Oil Products, US (Delta Consultants Inc.)
2838 Lone Tree Way,
Antioch, CA 94509**

The Bay Area Air Quality Management District (the BAAQMD) is a local agency that regulates stationary sources of air pollution such as factories, industrial sites, and gasoline stations.

Whenever we receive a permit application for a new or modified source of toxic air contaminants located within 1,000 feet of a school site, State law requires that we notify the public. To comply with this requirement, we distribute or mail a Public Notice to the parents or guardians of students enrolled at schools located within ¼ mile, and all residents and businesses located within 1,000 feet, of the proposed source.

You are receiving this Public Notice because a permit application has been filed with the BAAQMD for the above referenced source of air pollution. A description of the proposed project follows:

To remedy an existing contamination problem, a Soil Vapor Extraction and Treatment System along with an oxygen pulse injection system (OPIS) has been proposed for this site. This site is an active Shell service station that had leaking underground storage tanks that contaminated the soil. On behalf of Shell, Delta Consultants Inc., has proposed a system consisting of a vacuum blower to extract petroleum vapor from wells drilled at the site. Treatment of the extracted vapor will be accomplished by either a Thermal/Catalytic Oxidizer. Emissions from the proposed source will be significantly controlled; however, it is not possible to control the source such that emissions are zero.

The BAAQMD has determined that the increase in health risks resulting from toxic air contaminant emissions from the proposed source are within acceptable levels, and that the project will comply with all other applicable air pollution control requirements. Accordingly, the BAAQMD plans to issue a Permit to Operate for the proposed project.

If you are interested in getting more information on the BAAQMD's evaluation of this proposed project, you may request copies of the applicable staff report by calling the BAAQMD at the telephone number listed at the end of this notice. This information also can be viewed or downloaded from the BAAQMD website at:

http://www.baaqmd.gov/pmt/public_notices/index.htm

PUBLIC COMMENT PERIOD

There is a 30-day period for public response to this proposal. If you wish to comment on the proposed project, you may do so in writing or by e-mail. Alternatively, you may call and leave a telephone message up to one minute in length. Please leave your name and telephone number so that a BAAQMD staff member may respond to your message.

Please use the following contact information if you would like to comment on the proposed project:

Mailing address: Shell Oil Products, US (A#18384)
Public Notice Response
