Subject: Russell City Plant

Mr. Lee:

I find it very hard to obey the BAAQMD order that I received this morning to not burn a piece of wood in my fireplace because of "air quality" when the District plans to issue a permit for Calpine to emit 86.8 TONS of particulate matter a year into the air I have to breathe. That is 475 pounds of particulate matter every day!!!!!!!!!!!!!! Is this senseable?????? I think not.
