Subject: Stop the power plant in Russell City

Dear Mr. Weyman

This proposed power plant is totally irresponsible and should be stopped. We can not go on putting our heads in the sand and continue to ignore the effect pollution is doing to our planet and the Bay Area. There are plenty of Clean Green ways to produce power. This has to stop & stop now! The East Bay already suffers from the poor air quality due to the Port of Oakland and all the trucks that are using the freeways in and out of the Port. Everyday it is getting worse and this power plant will only add to it.
