Subject: Public Hearing and Notice, Russell City Energy Center, Hayward, CA

Dear Mayor Sweeney and Council Members:

I received the public hearing notice from the Bay Area Air Quality Management District. I spoke extensively with Mr. Weyman Lee, P.E, Senior Air Quality Engineer, at the Bay Area Air Quality Management District. My comments to him did not hold any scientific substance to sway the District's decision to disapprove the permit to build the power plant so I am coming to you as the City of Hayward officials to ask you to use everything in your power to disapprove the building of this plant. We have worked long and hard and continue to work hard to improve the city of Hayward and this power plant will be a complete step back to everything we are working toward. I know that your power is limited but I want to remind you that some of you were elected or re-elected to your post because of your opposition to building this plant. Please do your best.
