Subject: Proposed Hayward Power Plant

As you know, we have been fighting this plant for some time. The problem is not so much the air quality, as the termination of any plans for building such a plant that in this climate is OLD TECHNOLOGY and doesn't benefit anyone, especially Hayward, since we will not be served by this facility. I would not be opposed to windmills or solar, but I do oppose gas, it's expensive, pollution prone, dangerous, and doesn't benefit Hayward.

CalPine has a very disreputable track record and they are not worthy of Hayward's welcoming committee.

THE CITIZENS OF HAYWARD DO NOT WANT THIS PLANT BUILT ON OUR SHORE.
