Dear Mr. Lee:

We are writing on the matter of the proposed air quality permit for the Russell City Energy Center.

My husband and I live on Thayer Avenue in Hayward, a short distance from the proposed facility. The proximity of both State Route 92 and Interstate 880, both with traffic congestion every day, already creates an air quality hazard at our location. We don't know if you can measure it or not, but we can see the excessive particulate matter that collects in our home and on our cars. <!--[endif]-->

Much more is known now than was known at that this facility was originally proposed. We know that the shortages we experienced at that time were due to market manipulation. We know a lot more about global warming. <!--[if !supportEmptyParas]-->We know a lot more about green technologies. <!--[endif]-->

Surely, with all that we have learned, we can approach our energy needs with something more suitable than this proposed power plant. <!--[endif]-->

We urge you not to grant this permit.

Sincerely,

Dennis DuBose  
Joan DuBose  
Hayward, CA 94545-2923
