Subject: Public Hearing - Russell City Energy Center

Thank you for returning my call; I'm sorry that I missed you. I was a bit confused by the title of the Prevention of Significant Deterioration Permit for the proposed Russell City Energy Plant. As I understand it, the permit, if issued, would allow the plant to be built in Hayward.

I'm requesting that the permit be denied on the basis that, in fact, the plant will cause a deterioration of air quality in Hayward, specifically in the Shoreline area, an area already in violation of National standards for air quality. Further, I am concerned that BAAQMD has not made it clear that the Air District is not using "start up" emissions in measuring air quality surrounding the operation of the power plant.
