Subject: Russell City Energy Center

Gentlemen,

Our company operates three Cessna Citation aircraft which are based at the Hayward Executive Airport. Two of these aircraft are actively engaged in the "on demand" charter business, and the third is managed for a private owner. In addition, I operate several other aircraft which I own personally that are also based at Hayward.

We have reviewed the proposal for the Russell City Energy Center, and we do not believe that this new facility will interfere with our flight operations in any way what-so-ever. We urge that the project be approved for the benefit of the City of Hayward.

Most sincerely,

--
