Subject: Hayward power plant permit

I would like to say that I am for any power plant that will help put coal plants off line but to locate this power plant in Russell city (Hayward) right next to the shoreline and the San Mateo bridge is just unfathomable. I understand bringing this plant online would be the environmentally correct thing to do but not if it isn't in an environmentally correct location. Not to mention that it would be an eye soar for locals and commuters crossing our beautiful bay bridge. Please help keep the Bay Area clean and beautiful. No amount of money is worth going against what is right for the Bay Area, the State, and the country.

Sincerely,

Christopher Kidwell

(Hayward Resident)
