Subject: The Hayward potential powerplant

Dear Mr Lee,

I am writing you to voice my objection to the Powerplant planned for Hayward shoreline.

I have lived in Hayward most of my life, as well as went to Cal State Hayward. I live in Hayward because I love the city. I love the parks and the people who live here.

This powerplant is not needed. The idea for the powerplant was created during the energy crisis back in the early 1990's and was a lie. The power shortage was manipulated by Enron and PG & E as we all know right now.

Calpines wants to stay afloat on the backs and health of Hayward citizenry. They want to turn Hayward into another Martinez or another Point Richmond.

Unfortunately the City Council members for Hayward are mainly bought by Big Business and have been for a long time now. They do not adequately represent us, the citizens of Hayward.

Please look at the true issues here in this matter, and know that we the people of Hayward do NOT need another polluting business in Hayward. We do NOT need any further pollution in our air or on our shoreline. We do not need to destroy the integrity of the shoreline any more. In fact, in these days, we need to be thinking green sustainable energy.

regards,  
Stephania Widger  
Scientist and citizen of Hayward
