Subject: Power Facility Endorsement

Hello, Mr. Weyman:

I have spoken with Becca Rosati on several occasions concerning the "Russell City Power Plant" project. She sent me your e-mail address in order to make a comment on my views of the Russell City Power Plant project. I have been a resident of Hayward since 1963. I am currently a board member of the "Hayward Neighborhood Alert" and a Commissioner of the "Hayward Human Services Commission". As a Pilot, I have flown out of the Hayward Airport for the last thirty years.

As a long time resident of the city, I am concerned about its environment and well being. I have no scientific background from which to issue a "qualified technical opinion" with regards to the construction of a Russell City Power Plant.

Nevertheless, I do support the idea that incremental steps must be taken to move in a responsible way toward a greener, pollution free environment while maintaining and adequate source of power for the future. In my view, the Russell City project meets this challenge.

Ben L. Henderson
