Weyman Lee
Bay Area Air Quality Management District
939 Ellis Street
San Francisco, CA 94109

Dear Mr. Lee:

I'm fourteen years old, and I live in Hayward, and I don't want you to install this power plant. Forty years into the future, you might not be alive any longer, but I will be, and also any children I might have. If you install this power plant our environment will be severely affected. The bay will be very polluted and the air quality will be so bad it will no longer be breathable. If we want to prevent climate change, we will have to cut our carbon emissions by at least 90%. That will be much more difficult if this power plant is installed. The school where I take classes, Chabot College, will be ground zero for the pollution. Please reconsider installing this plant.

Thank you,

Blenda Purpura-Pontoniere
