BAY AREA AIR QUALITY  
MANAGEMENT DISTRICT

Dear Mr. Lee:

I am a sixteen-year-old resident of Hayward, CA, and I beg you and the BAAQMD to decide not to construct this power plant. The future is my generation, and we want to make it bright by going green and reducing carbon emissions so that this world will EXIST fifty years from now. This power plant will impact us much more than it will you, because *we* will have to deal with the pollution when your generation is gone. There are always other options, such as solar energy or wind power, so please don't install this plant. Please take my letter and those of dozens of others into consideration before a decision is made.

Thank you.

Sincerely,

Lucia Purpura-Pontoniere
