Dear Mr. Lee,

I am 100% opposed to having the Russell City Energy Center located here in Hayward. First it doesn't benefit us in any positive way. What it will do however is endanger our health and environment.

I work at Chabot College and this is where all these pollutants will fall. We are Ground Zero for the highest concentrations of these toxic chemicals which will be produced yearly, for the 30 plus year life of the plant's operation. This affects myself along with about 15,000 others who work and go to school here, not to mention everyone who lives in the surrounding areas like myself.

This is unacceptable, this is an outrage, and NO... we don't want the Russell City Energy Center in our backyard.

Those who stand to gain from the Russell City Energy Center (such as the developer) have no concerns of how this plant will negatively impact the life of others whose health, air quality, and environment will be affected.

I hope anyone in the final decision making will take a moment to put his or herself and their families in the position of the people in this and near by communities, then, please... do the right thing.

Thank you in advance,  
sincerely,

Nanette Aldana
