Re: Calpine plant in Hayward

Dear Sir:

As 58 year residents of Hayward, we are voting against the Calpine power plant. Although you say it is "clean" & more efficient than older plants we do not want its emissions harming our population. There are many reasons to not have this plant in Hayward which I will not go into.

Put this plant across the bay where most of its energy will be going! Let them suffer the consequences.

Thank you for your consideration,
