Subject: Opposition to Russell City Power Plant

Dear Mr. Lee,
I'm writing to voice my strident opposition to the proposed Russell City Power Plant. This polluting power plant will detrimentally impact the Chabot College Community faculty and students for years to come, in addition to the Hayward community at large. At a time when Chabot College is moving toward sustainability and training its students to participate in the Green Economy, the Russell City Power Plant proposal is an outmoded response to an energy crisis of the past. This type of energy is not wanted or needed in Hayward.

Vote no on this project and help Hayward move in a positive direction toward long-term growth, health, and productivity.

Sincerely,

Alisa Klevens
English Faculty
