Subject: NO to Power Plants near Chabot College area

Mr. Lee,

A veteran of Chabot College for 15 years, ARE YOU KIDDING???? Words could not describe how disturbing this proposal is about? I cannot believe, ONE would fathom killing millions of people with carcinogenic chemicals. These are toxins Mr. Lee, could this be plotted out as intended human defecation - process of elimination like they do with dogs and cats? Because if it is, the powers that be are just as guilty as Adolf Hitler.

We've come along way, to create a cleaner environment, a lot of the toxins and chemicals that were being used at one time when this entire Bay Area was nothing but farm land, vehicles that were not getting smogged etc... all the chemicals used on sprays, and agricultural lands - THINGS ARE GETTING BETTER!! WERE just beginning to go GREEN on campus - much of what we're trying to advocate to the community, - NO NO NO on power plants. I have a hard time breathing right now. In fact, Many of our toddlers 1-4 are developing ASTHMA and other illnesses before they could enjoy their childhood years!!! As it is we're receiving more EMF's in our lives today than we ever were - why would you CONSIDER Mr. LEE? WHY???

Please do not approve this power plant near our area.!!!

Patricia Posada
