Subject: Russell City Power Plant

Dear Mr. Lee:

I am writing to express my opposition and outrage at the thought that a power plant is to be opened at the end of Depot. Saying that the plant is going to burn cleaner than other power plants is merely an attempt to sugar coat the fact that soon our community is to be showered by slightly-less harsher chemicals than a traditional power plant. I personally have an environmental conscience as well as a passion for Hayward, where I was born and raised. I ride my bike to work and Chabot every day and have enough of a time breathing in the exhaust from all the cars up and down Mission and Hesperian. The last thing I need is to be inhaling horrible chemicals while riding my bike. I know I am not the only one against this power plant and I hope that the health of our community will be taken into consideration while making the decision.

Thank you very much for your time.

Sincerely,

Laura Diesman
