Subject: Russell City Power Plant Proposal

Hello Mr. Weyman,

I am sending this email to express my feelings regarding the proposal to build a power plant within the vicinity of Ochoa Middle School and Chabot College in Hayward, Ca on Depot Road.

My peers and I are extremely uncomfortable with this idea and it raises very serious health concerns. If it is necessary to build a power plant it should be away from schools and residential areas.

Students should not be exposed to high levels of ammonia, benzene, formaldehyde or any other toxins. Students at these schools are the future of this city, we should be doing our best to ensure their freedom instead of trying to poison them. . Literally.

Thank you for taking the time to read this email.
