Subject: STOP The Russell City Energy Center
Dear Mr Weyman Lee:
Bay Area Air Quality Management District
939 Ellis Street, San Francisco Ca. 94109

Concerning the Russell City Energy Center:

This letter is to officially register my wholehearted and informed opinion AGAINST the Russell City Energy Center. The power plant will severely pollute the air in the area of Chabot College and the surrounding community, this is so wrong. You need to, and can do, a better job! BAAQMD should stop this plant and not place our community and students in harm's way. This will definitely harm our environment. Please do not let this plant be built. Please do not let Hayward's air be abused in this way.

Michael Absher
Chabot Faculty and Parent of a Chabot Student
