Subject: Russel energy center

Hi Mr. Lee,
I am emailing to put in my voice for not being in favor of Russel energy center in Hayward by Depot Rd. I work for Chabot College and live in this area so can see the long term impact of this establishment. Chabot College has thousands of students enrolled and children in our care center along with residents in the neighborhoods. We sure do not want to breath polluted air and also need to keep our young generation away from it. We are offering education to these adults for their bright futures and certainly don't want to be next to an energy plant that jeopardizes their quality of life.

Thank you.
