Please for your consideration,

Help us at Chabot COLLEGE not breathe the pollution that this new power plant will spue out of its smoke stack and contaminate the air we breathe.

I'm hopeful that the CalPine Corporation consideration of Hayward goes away like they did in the southbay only because as a Chabot employee I will be here for 40 hours a week or more.

With bronchitis like symptoms that could be more vulnerable to more air born pollutants than other people.

Isn't there more cleaner, more technological power source that can be used, not for the benefits of others, but for Hayward residents who should be considered not for the value of the project for its customers but the value towards the community without adversely affecting its eco system.

Thanks for your time

Miguel Casarez
