Subject: Concern from a lifetime resident of Hayward

As a person who has grown up in Hayward, and will live in Hayward from many more years, I would like to express my concern for the power plant being built in our city. Besides from the obvious health concern my biggest complaint has to be the lack of communication with the people of Hayward. How can you not care about the potentially horrific effects that are about to be sentenced to us by your power plant? Look at it from a perspective if you lived here. Would you want to raise kids next to a power plant? Please show us mercy for the sake of us and our children.

From,

Ted Nguyen
