Mr. Weyman Lee
Senior Air Quality Engineer
Bay Area Air Quality Management District
939 Ellis Street
San Francisco, California 94109

Dear Mr. Lee:

I am writing in response to constituent concerns that have been brought to my attention regarding the Russell City Energy Center's current seeking of a Prevention of Significant Deterioration permit (PSD) to operate in the city of Hayward.

In your analysis of the BAAQMD 2009 Clean Air Plan, related to the Russell City Energy Center, my constituents have expressed, in the strongest manner, the importance of including the emissions studies of Professor Mark Z. Jacobson, known as the Jacobson Effect. It has been pointed out that the Jacobson methodologies will assist the Bay Area Air Quality Management District in quantifying the potential amount of pollutants and the toxicity of the pollutants emitted from the Russell City Energy Center.

I urge in your analysis, the BAAQMD give serious consideration to the concerns and recommendations from my constituents.

Thank you for your attention to this matter.

Sincerely,

Pete Stark
Member of Congress
