Subject: Russell City Power Plant...

I have viewed this issue from all angles... I am not usually compelled to "write" letters, but time only permits this brief e-mail...

Calpine is, without a doubt "40% more efficient than other plants and 90% cleaner in emissions"

...but is that not like saying they are 90% less deadly than other plants?

HUSD employees have many concerns. Especially Ochoa Middle School parents/teachers who, until now, were unaware of this project.

Please reconsider the impact on our community...

Sincerely,  
Hayward resident since 1975
