Subject: Oppose - Calpine power plant

Dear Mr. Lee,

As a citizen of Alameda County, I am very concerned about the proposed Calpine Russell City power plant that may be built in South Hayward. I strongly urge you to deny the PSD permit that the corporation is seeking at this time. The power plant will undermine Hayward City policies for sustainability, and despite Calpine's protests to the contrary, represents a step backwards in energy technology.

I am concerned in particular about the impact on the air quality and local wildlife and environment.

Thank you for your consideration. I hope you will do the right thing to protect our local environment.

Sincerely,

Mark Schlosberg
