Russell City energy center

Power plant Arguments.doc; SKMBT_C35209091606140[1].pdf; Attachments: SKMBT_C35209091606150[1].pdf

Dear Mr. Lee,

I have attached a letter and signatures that were gathered from both the Industrial area within 1/2 mile of the proposed plant and from an area of the Hayward Hills where some of the pollutant fallout will end up. These were gathered in a 2 hour stretch on Tuesday morning 9/15/09 by Mr Alemayehu. Many, if not all of these people were completely unaware of the project or the hearings to date. We believe this needs to be corrected as this is a huge group of people who have had their rights subverted.

Thankyou

Patrick Turney Dereje Alemayehu

P.S. we have also mailed the original copy by postal service.

September 14th 2009

Weyman Lee, Senior Engineer BAAQMD 939 Ellis St. San Francisco, CA 94109

Letter of Opposition to the proposed Construction of the Russell City Energy Center

The City of Hayward, as the "Heart of the Bay," should be futuristic and forward looking when it comes to making decisions as consequential as building a 600 megawatt power plant.

The city should rethink itself as **the next generation energy technology hub** of the San Francisco east bay, much like the Silicon Valley is for computer high tech. We must make decisions that incorporate the health and economic future of this community now and in the future. As leaders, and community members, of this historic city we should always demand and get the best that a 21st century technology offers. These environmentally friendly technologies may include solar, wind, and bio energy electrical power.

The decision facing us today is consequential, because it will negatively affect the air quality for people who live and work in our city and beyond. The quality of life will be lower especially for the elderly, the young, and for the people who suffer from respiratory ailments. This then affects home prices, and the city's ability to attract more business and residences. We can not let this plan go through.

These signatures were gathered within a 2 hour period and many more could have been obtained had people been properly notified of the hearings. Therefore, we believe that you should re-hold hearings and properly notify residents and workers in the area through targeted leaflets and postings, or other more public advertising.
