Subject: slightly late comment

This issue is important enough to me that I'm writing even though I understand the deadline for comments was yesterday. I oppose the Russell City power plant. It will add pollution to an already congested area, and it won't serve the community it's polluting. It was initially approved before we folks in the area were told about it. If we had known, there would have been an outpouring of opposition, as there was for the other power plant.

Please deny Russell City's application.

Thank you,
Kent Uchiyama
