Subject: Power Plant Proposal

Dear Sir,

I am writing to you in opposition to the Hayward, California Power Plant proposal which is hopefully NOT going to be built at the corner of Depot and Cabot. Heavy amounts of pollutants, the highest concentrations of which, will fall on nearby Chabot College and Ochoa Middle School endangering many children, youth and adults. The proposed facility would emit large amounts of certain toxic air contaminants in many neighborhoods causing a terrible health risk to hundreds of individuals.

I appreciate your concern, time and effort in considering the longterm effects of such a tremendous negative addition this Power Plant would have on our beautiful Hayward community. Thank you very much !

Sincerely,

Shirley J Bos
