9-3-09

Good Evening,

I am Betty Morse, Co-Chair of the Gray Panthers of Southern Alameda County, a former trustee of H. A. S. P.A. - a member of C.A.C., citizens Advisory Committee, who ^{all} oppose the building of the Calpine Power Plant in Hayward, Ca.

1. The Power plant does not ^{provide} services for the city of Hayward & the surrounding areas. This is a plant located outside of its service area & is not conducive to the people of Hayward & the surrounding area.

2. The Emissions produced from this plant are a hazard to the people. Mercury is one of the deadliest of the emissions which promotes Asthma, Bronchitis, Emphysema, & other respiratory diseases, along with cancer, & all are death causing factors to the health of the people in Hayward & the surrounding area. Emissions do not stay in Hayward. They are wind blown to ~~San~~ Louisa, Castro Valley Hills, along the Bay Trail to Walkers, Hipers, Bikers, & others who use the Interpretive Center, as well as southward down the San Francisco Bay.

3. The Bay Trail is designated as open space & it is to remain as such, along with the esthetics of the Power Plant are not conducive to the open space plan.

Gray Panthers So. Ala. Co.

8-9-09

4. The operation of the Power Plant is a High Risky Business operation. It is continually in a Bankruptcy environment. There is no stability in transactions in the operation of a business that has been in a Bankruptcy position since it has come to Hayward ^{asking} for permission to build a Power Plant. Poor business practices. No assets.

5. I personally am a founding member of the Friends of the Hayward Library & oppose to the business of operating a Power Plant in Hayward, for the Health Well being of the people are at Stake.

Thank you for your time.

Betty Moore
