Subject: Fw: Letter to Rusesell Ci ty Energy Center

Dear Weyman Lee,

Hello, my name is Allen Custodio and I'm a student at San Lorenzo high school. San Lorenzo and Hayward doesn't want the Fossil Fuel power plant. If you build the fossil fuel plant it will harm the environment. The fossil fuel power plant will increase pollution and it will destroy the environment. Innocent people and innocent animals will have to breathe it everyday. So please stop the fossil fuel power plant and save the environment. I think you should build a solar plant, instead of building a fossil fuel plant. Solar plants are better for the environment and it won't increase pollution. And it won't harm the environment. Also a big factor in our generation is global warming. Also Carbon Di oxide known as co2 will admit 1,926,399 tons! I hope that we prevent global warming from happening, it is really important that we try to do something about it.

Sincerel y Allen
