Subject: Fossil fuel Plant.

Dear Wayne Lee,

Renacel Custodio is my name. I attend San Lorenzo High School. I'm a sophomore at the age of 15 and involved in Green Academy. To us at San Lorenzo High School, the fossil fuel power plant isn't as necessary as you think it is. On the other hand, it's better off to build a solar plant. It's more environmentally friendly and won't increase pollution, which leads to helping out on stopping global warming. It's good to show us positive influences. Not only do innocent animals breathe in all that pollution, but to us as well. We should halt the construction of this power plant immediately. Yes, they say the future are on the hands of us kids, but it's also in your hands as well. So please do take advantage of stopping this.

Sincerely Renacel Custodio
