Subject: I am Lluvia Laurens.

Dear Mr. Weyman:

Hi, my name is Lluvia Laurens and I'm a student at San Lorenzo High School and I'm in the 4 ELA Class. (Green Academy)

Well first of all I want to say that I'm against of keeping the 14 story high fossil fuel power plant. My reasons are: First of all, the plant emits 121,000 lb /year of Ammonia. If the Ammonia gets mixed with water it can make like an acid and it might ruin the bay area which is really close to it. It also emits 12.2 tons /year of Sulphur Dioxide which is the main contributor of global warming. As well emits 389.3 tons Of Carbon Monoxide (CO) per year. It's a very dangerous pollutant. Also emits 1,926,399 metric tons of carbon Dioxide, which is also the main contributor of global warming. Thank you for taking the time to read my letter and for caring about our opinion.

Sincerely: Lluvia Laurens.
