All residential and business neighbors located within 1,000 feet of the proposed new or modified source of air pollution listed below.

FROM: Bay Area Air Quality Management District

RE: Permit Application #18375 for the following source of air pollution:

Gasoline Dispensing Facility

Town of Tiburon

199 Kleinert Way

Tiburon, CA 94920

The Bay Area Air Quality Management District (the BAAQMD) is a local agency that regulates stationary sources of air pollution such as factories, industrial sites, and gasoline stations.

Whenever we receive a permit application for a new or modified source of toxic air contaminants located within 1,000 feet of a school site, State law requires that we notify the public. To comply with this requirement, we distribute or mail a Public Notice to the parents or guardians of students enrolled at schools located within ¼ mile, and all residents and businesses located within 1,000 feet, of the proposed source.

You are receiving this Public Notice because a permit application has been filed with the BAAQMD for the above referenced source of air pollution. A description of the proposed project follows:

Increase of the annual throughput of gasoline at an existing gasoline dispensing facility at the Town of Tiburon, 199 Kleinert Way, Tiburon, CA 94920.

The BAAQMD has determined that the increase in health risks resulting from toxic air contaminant emissions from the proposed source are within acceptable levels, and that the project will comply with all other applicable air pollution control requirements. Accordingly, the BAAQMD plans to issue a Permit to Operate for the proposed project.

If you are interested in getting more information on the BAAQMD's evaluation of this proposed project, you may request copies of the applicable staff report(s) by calling the BAAQMD at the telephone number listed at the end of this notice. This information also can be viewed or downloaded from the BAAQMD website at:
