Subject: MEP: Proposed Modifications to the Mariposa Energy Project Permit Application
Good Evening Madhav,

Attached is an electronic copy of the Mariposa Energy LLC's proposed modifications to the Mariposa Energy Project permit application. The attached document has been prepared as a follow up to our meeting with you and your management this past November and includes a response to the following items:

- 1.) the number of hours required for commissioning activities
- 2.) the emission rates per start-up and shutdown event
- 3.) the proposed CO and PM10/2.5 turbine emission rates
- 4.) the District's request for a BACT analysis

A hard copy of the attached document has also been sent to you this evening, as well as, a copy to Brian Bateman.

Please note that Mariposa Energy LLC would also like to meet with you and your management, at your earliest convenience, to discuss the proposed changes. If you have any questions regarding this submittal in the interim, please give me a call.

Regards,

Keith McGregor

Associate Project Manager
