

BAY AREA
AIR QUALITY
MANAGEMENT
DISTRICT

PUBLIC NOTICE

May 27, 2010

TO: Parents or guardians of children enrolled at the following schools:
John F. Kennedy High School
All residential and business neighbors located within 1,000 feet of the proposed new or modified source of air pollution listed below.

FROM: Bay Area Air Quality Management District

RE: Permit Application #21485 for the following source of air pollution:
Soil Vapor Extraction System
Ardenbrook, Inc. (Fremont French Cleaners)
4949 Stevenson Boulevard,
Fremont CA 94538

The Bay Area Air Quality Management District (the “District”) is a local agency that regulates stationary sources of air pollution such as factories, industrial sites, and gasoline stations.

Whenever we receive a permit application for a new or modified source of toxic air contaminants located within 1,000 feet of a school site, State law requires that we notify the public. To comply with this requirement, we distribute or mail a Public Notice to the parents or guardians of students enrolled at schools located within ¼ mile, and all residents and businesses located within 1,000 feet, of the proposed source.

You are receiving this Public Notice because a permit application has been filed with the District for the above referenced source of air pollution. A description of the proposed project follows:

To remedy an existing contamination problem, a Soil Vapor Extraction and Treatment System has been proposed for this site, Fremont French Cleaners. Ardenbrook, Inc. has proposed a system consisting of a vacuum blower to extract dry cleaning solvent (perchloroethylene, aka, tetrachloroethylene) vapor from wells drilled at the site. Treatment of the extracted vapor will be accomplished by Carbon adsorption. Emissions from the proposed source will be significantly controlled; however, it is not possible to control the source such that emissions are zero.

The District has determined that the increase in health risks resulting from toxic air contaminant emissions from the proposed source are within acceptable levels, and that the project will comply with all other applicable air pollution control requirements. Accordingly, the District plans to issue a Permit to Operate for the proposed project.

If you are interested in getting more information on the District's evaluation of this proposed project, you may request copies of the applicable staff report by calling the District at the telephone number listed at the end of this notice. This information also can be viewed or downloaded from the District website at:
