

BAY AREA
AIR QUALITY
MANAGEMENT
DISTRICT

PUBLIC NOTICE

June 23, 2011

TO: Parents or guardians of children enrolled at the following school(s):

*Pacific Rim International School
Emery Secondary School*

All residential and business neighbors located within 1,000 feet of the proposed new or modified source(s) of air pollution listed below.

FROM: Bay Area Air Quality Management District

RE: Permit Application #23308 for the following source(s) of air pollution:

**Solvent Cleaning Sources
Novartis Vaccines & Diagnostics, Inc.
4560 Horton Street
Emeryville, CA 94608**

The Bay Area Air Quality Management District (the "District") is a local agency that regulates stationary sources of air pollution such as factories, industrial sites, and gasoline stations.

Whenever we receive a permit application for a new or modified source(s) of toxic air contaminants located within 1,000 feet of a school site, State law requires that we notify the public. To comply with this requirement, we distribute or mail a Public Notice to the parents or guardians of students enrolled at schools located within ¼ mile, and all residents and businesses located within 1,000 feet, of the proposed source(s).

You are receiving this Public Notice because permit application 18714 has been filed with the District for the above referenced source(s) of air pollution. A description of the proposed project follows:

Novartis has applied for an increase in the amount of solvent cleaning solutions used at the facility. The solvent cleaning solutions are used to clean surfaces for the development and manufacture of pharmaceutical products. Novartis will use either a solution of 70% isopropyl alcohol and 30% water or 70% ethanol and 30% water. Novartis has requested the increase from 225 gallons per year to 350 gallons per year of cleaning solutions at Building 4.

The District has determined that the increase in health risks resulting from toxic air contaminant emissions from the proposed source(s) are within acceptable levels, and that the project will comply with all other applicable air pollution control requirements. Accordingly, the District plans to issue a Permit to Operate for the proposed project.

If you are interested in getting more information on the District's evaluation of this proposed project, you may request copies of the applicable staff report(s) by calling the District at the telephone number listed at the end of this notice. This information also can be viewed or downloaded from the District website at:
