

BAY AREA
AIR QUALITY
MANAGEMENT
DISTRICT

PUBLIC NOTICE

December 1, 2011

TO: Parents or guardians of children enrolled at the following school:

St. Catherine of Siena School

All residential and business neighbors located within 1,000 feet of the proposed new or modified source of air pollution listed below.

FROM: Bay Area Air Quality Management District

RE: Permit Application #23712 for the following source of air pollution:

**Sub-Slab Depressurization System
Former Caine Cleaners, RRM
1319 Howard Avenue
Burlingame, CA 94010**

The Bay Area Air Quality Management District (the “District”) is a local agency that regulates stationary sources of air pollution such as factories, industrial sites, and gasoline stations.

Whenever we receive a permit application for a new or modified source of toxic air contaminants located within 1,000 feet of a school site, State law requires that we notify the public. To comply with this requirement, we distribute or mail a Public Notice to the parents or guardians of students enrolled at schools located within ¼ mile, and all residents and businesses located within 1,000 feet, of the proposed source.

You are receiving this Public Notice because a permit application has been filed with the District for the above referenced source of air pollution. A description of the proposed project follows:

To remedy an existing groundwater contamination problem, a Sub-Slab Depressurization System has been proposed for this site. Dry cleaning solvent (perchloroethylene and trichloroethylene) was found to be present in the surrounding soil. On behalf of Former Caine Cleaners, RRM consultants have proposed a system consisting of a vacuum blower to extract organic vapors from beneath the slab foundation of the building at this site. The Sub-Slab Depressurization System is intended to insure that vapors will not collect within the building above the foundation. Emissions from the proposed source are expected to be negligible. Total air toxic emissions from this source are limited by permit conditions to less than 1 pound per day.

The District has determined that the increase in health risks resulting from toxic air contaminant emissions from the proposed source are within acceptable levels, and that the project will comply with all other applicable air pollution control requirements. Accordingly, the District plans to issue a Permit to Operate for the proposed project.

If you are interested in getting more information on the District's evaluation of this proposed project, you may request copies of the applicable staff report by calling the District at the telephone number listed at the end of this notice. This information also can be viewed or downloaded from the District website at:

PUBLIC COMMENT PERIOD

There is a 30-day period for public response to this proposal. If you wish to comment on the proposed project, you may do so in writing or by e-mail. Alternatively, you may call and leave a telephone message up to one minute in length. Please leave your name and telephone number so that a District staff member may respond to your message.

Please use the following contact information if you would like to comment on the proposed project:
